

## First-Time Students Retention Study

### **Cohorts - First-Time Students**

The cohorts include students at time of census with start term equal to cohort term (Fall). Includes all students, not just degree-seeking.

### **Fall to Fall Retention**

Each year's retention is determined by enrollments of the entire cohort; therefore a student that skips a semester but returns the next semester is counted as retained.

### **Semester to Semester**

Each term's retention is determined by enrollments of only those students enrolled in the previous term. If the students skips any semester they are not counted as retained, even if they enroll again, later. This is a measurement of continuous retention.
